REACH; Regulation (EU) no. 1907/2006

The main aim of REACH, regulation (EU) no. 1906/2006, is to ensure high levels of protection for people and the environment from unintentional exposure to the chemical substances. The majority of the chemical substances that one encounters in everyday life must be registered by the manufacturer/or importer. Registration ensures that documentation is drawn up for the impact of the substances on people and the environment.

Waste and products made from recycled waste do not need to be registered if recycling takes place within the EU and the substances that are recovered during the recycling process are the same that entered the process. This means that aluminum alloys produced by recycling by Emerus partners (billet's suppliers) are exempted from REACH registration according to art 2.7 (d) in the regulation.

Alloying elements (additives) in aluminum alloys produced by Emerus partners are registered according to REACH with the following REACH registration numbers:

<i>Substance</i>	<i>REACH registration number</i>
Al, Aluminum	91728-14-2
Aluminum potassium fluoride	60304-36-1
Fe, Iron	7439-89-6
Alloy of FeSi, Ferrosilicon	8049-17-0
Mg, Magnesium	7439-95-4
Mn, Manganese	7439-96-5
Ni, Nickel	7440-02-0
Zn, Zinc	7440-66-6
Pb, Lead	7439-92-1
Hg, Mercury	7439-97-6
Ti, Titanium	7440-32-6
Si, Silicon	7440-21-3
Cu, Copper	7440-50-8
Cr, Chromium	7440-47-3
